

- I chose to start off my ERD with the Customer Table
- The Customer Table has a Relationship with the Ticket Table which serves as a transactionary table to house which staff did the transation & which movie/movietime the customer selected
- Movie Time Table is the connecting table between Ticket & Movie because based on whcih movietime was selected would determine which hall location the movie would be showing in.
- Lastly, the Concession Table is tied with the Ticket Table as customers are only allowed to purchase concessions if they purchase a movie ticket (We run a tight ship). I
